

# BEV Risk Map Analysis Report

## Occlusion-Based Emergence Risk Assessment

Generated: 2025-11-24 13:25:51

Tool: BEV-RiskViz (BEV Risk Visualization Tool)

Purpose: Autonomous driving risk assessment based on occlusion analysis

Scenario Information:

Example: 4 - Export Formats

Description: Demonstration of export capabilities

Risk Calculation Parameters:

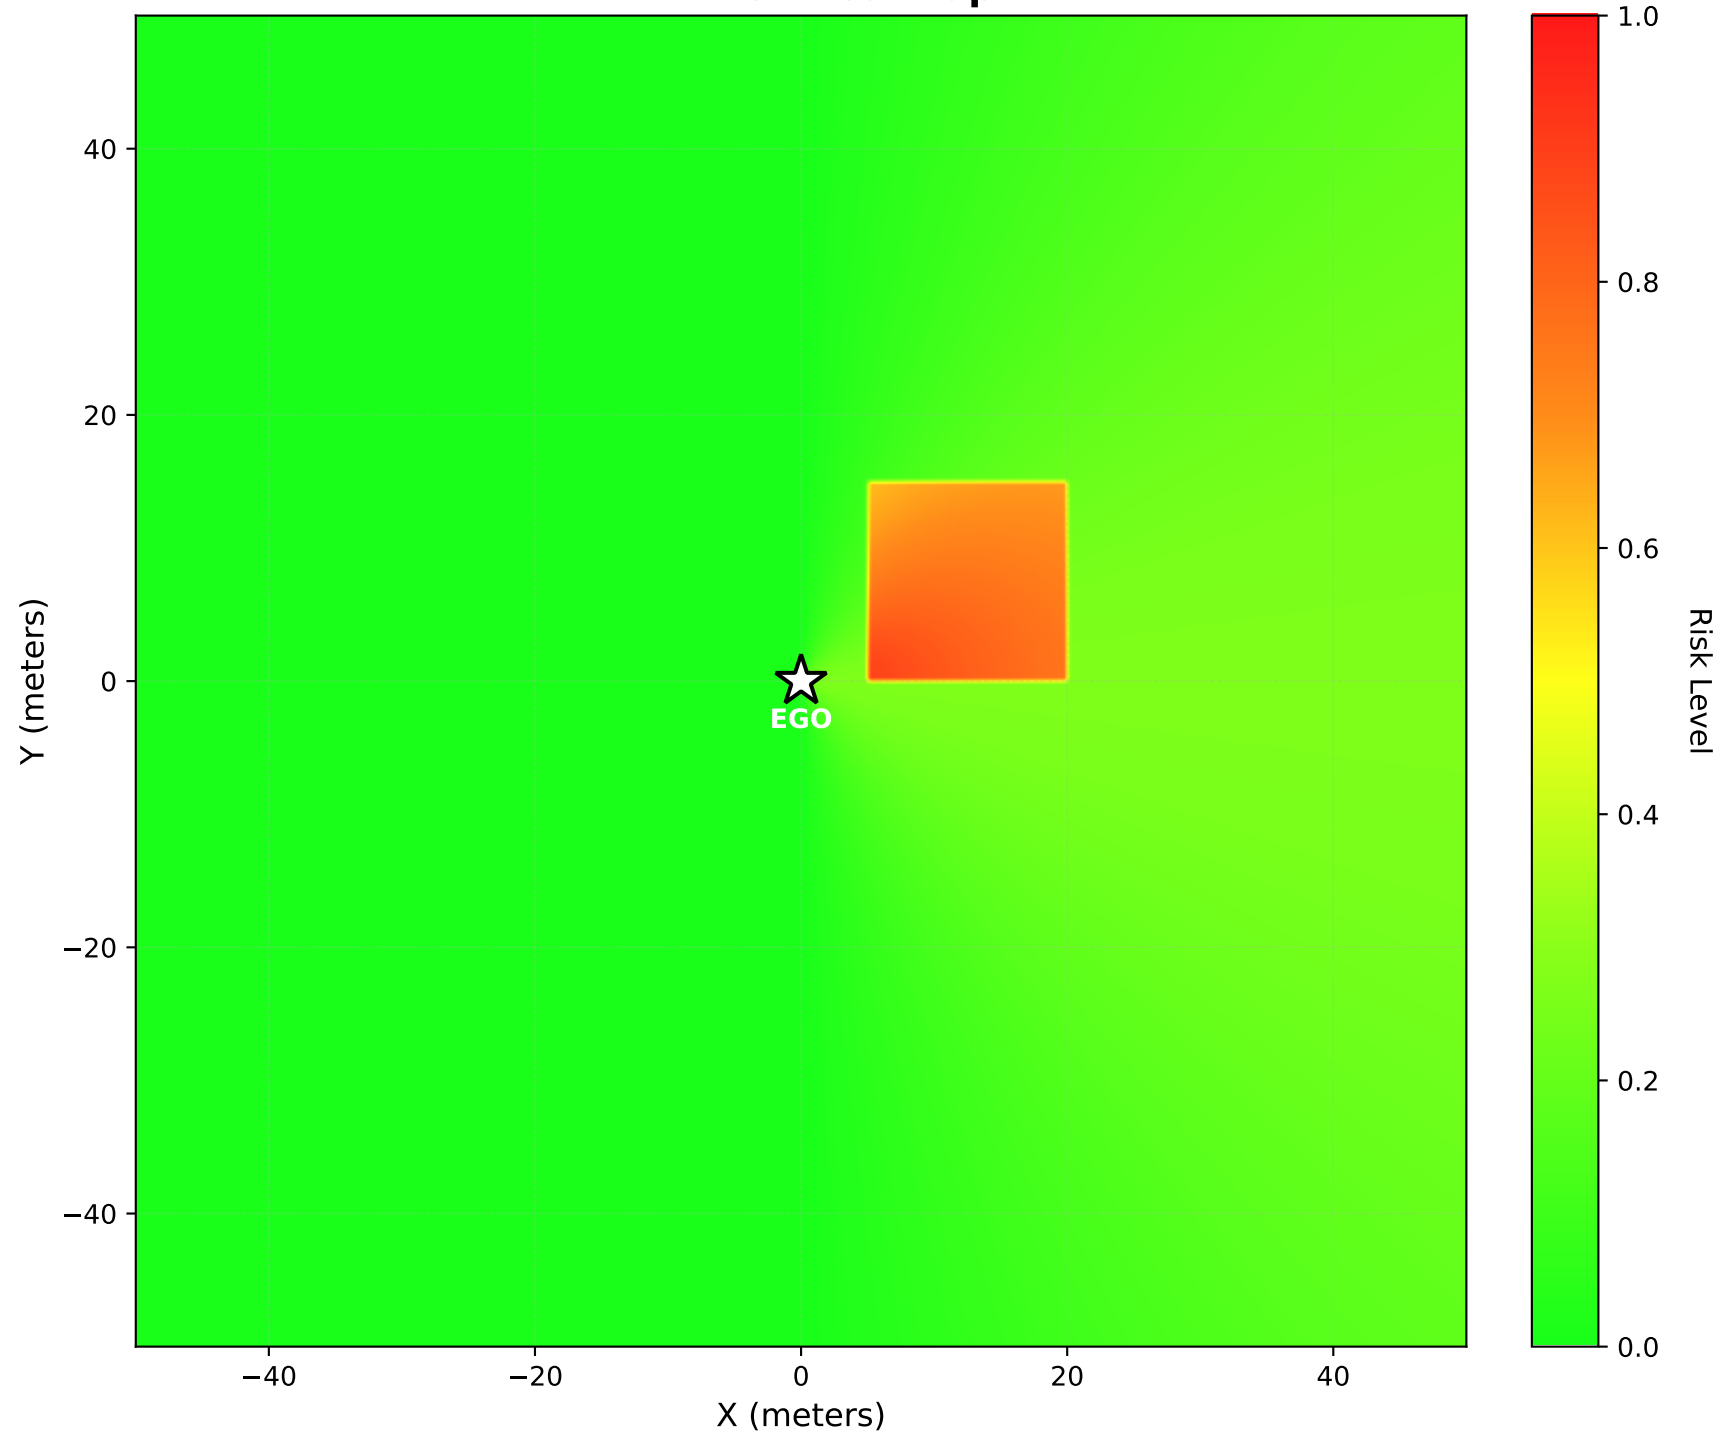

trajectory\_weight: 0.3

occlusion\_weight: 0.3

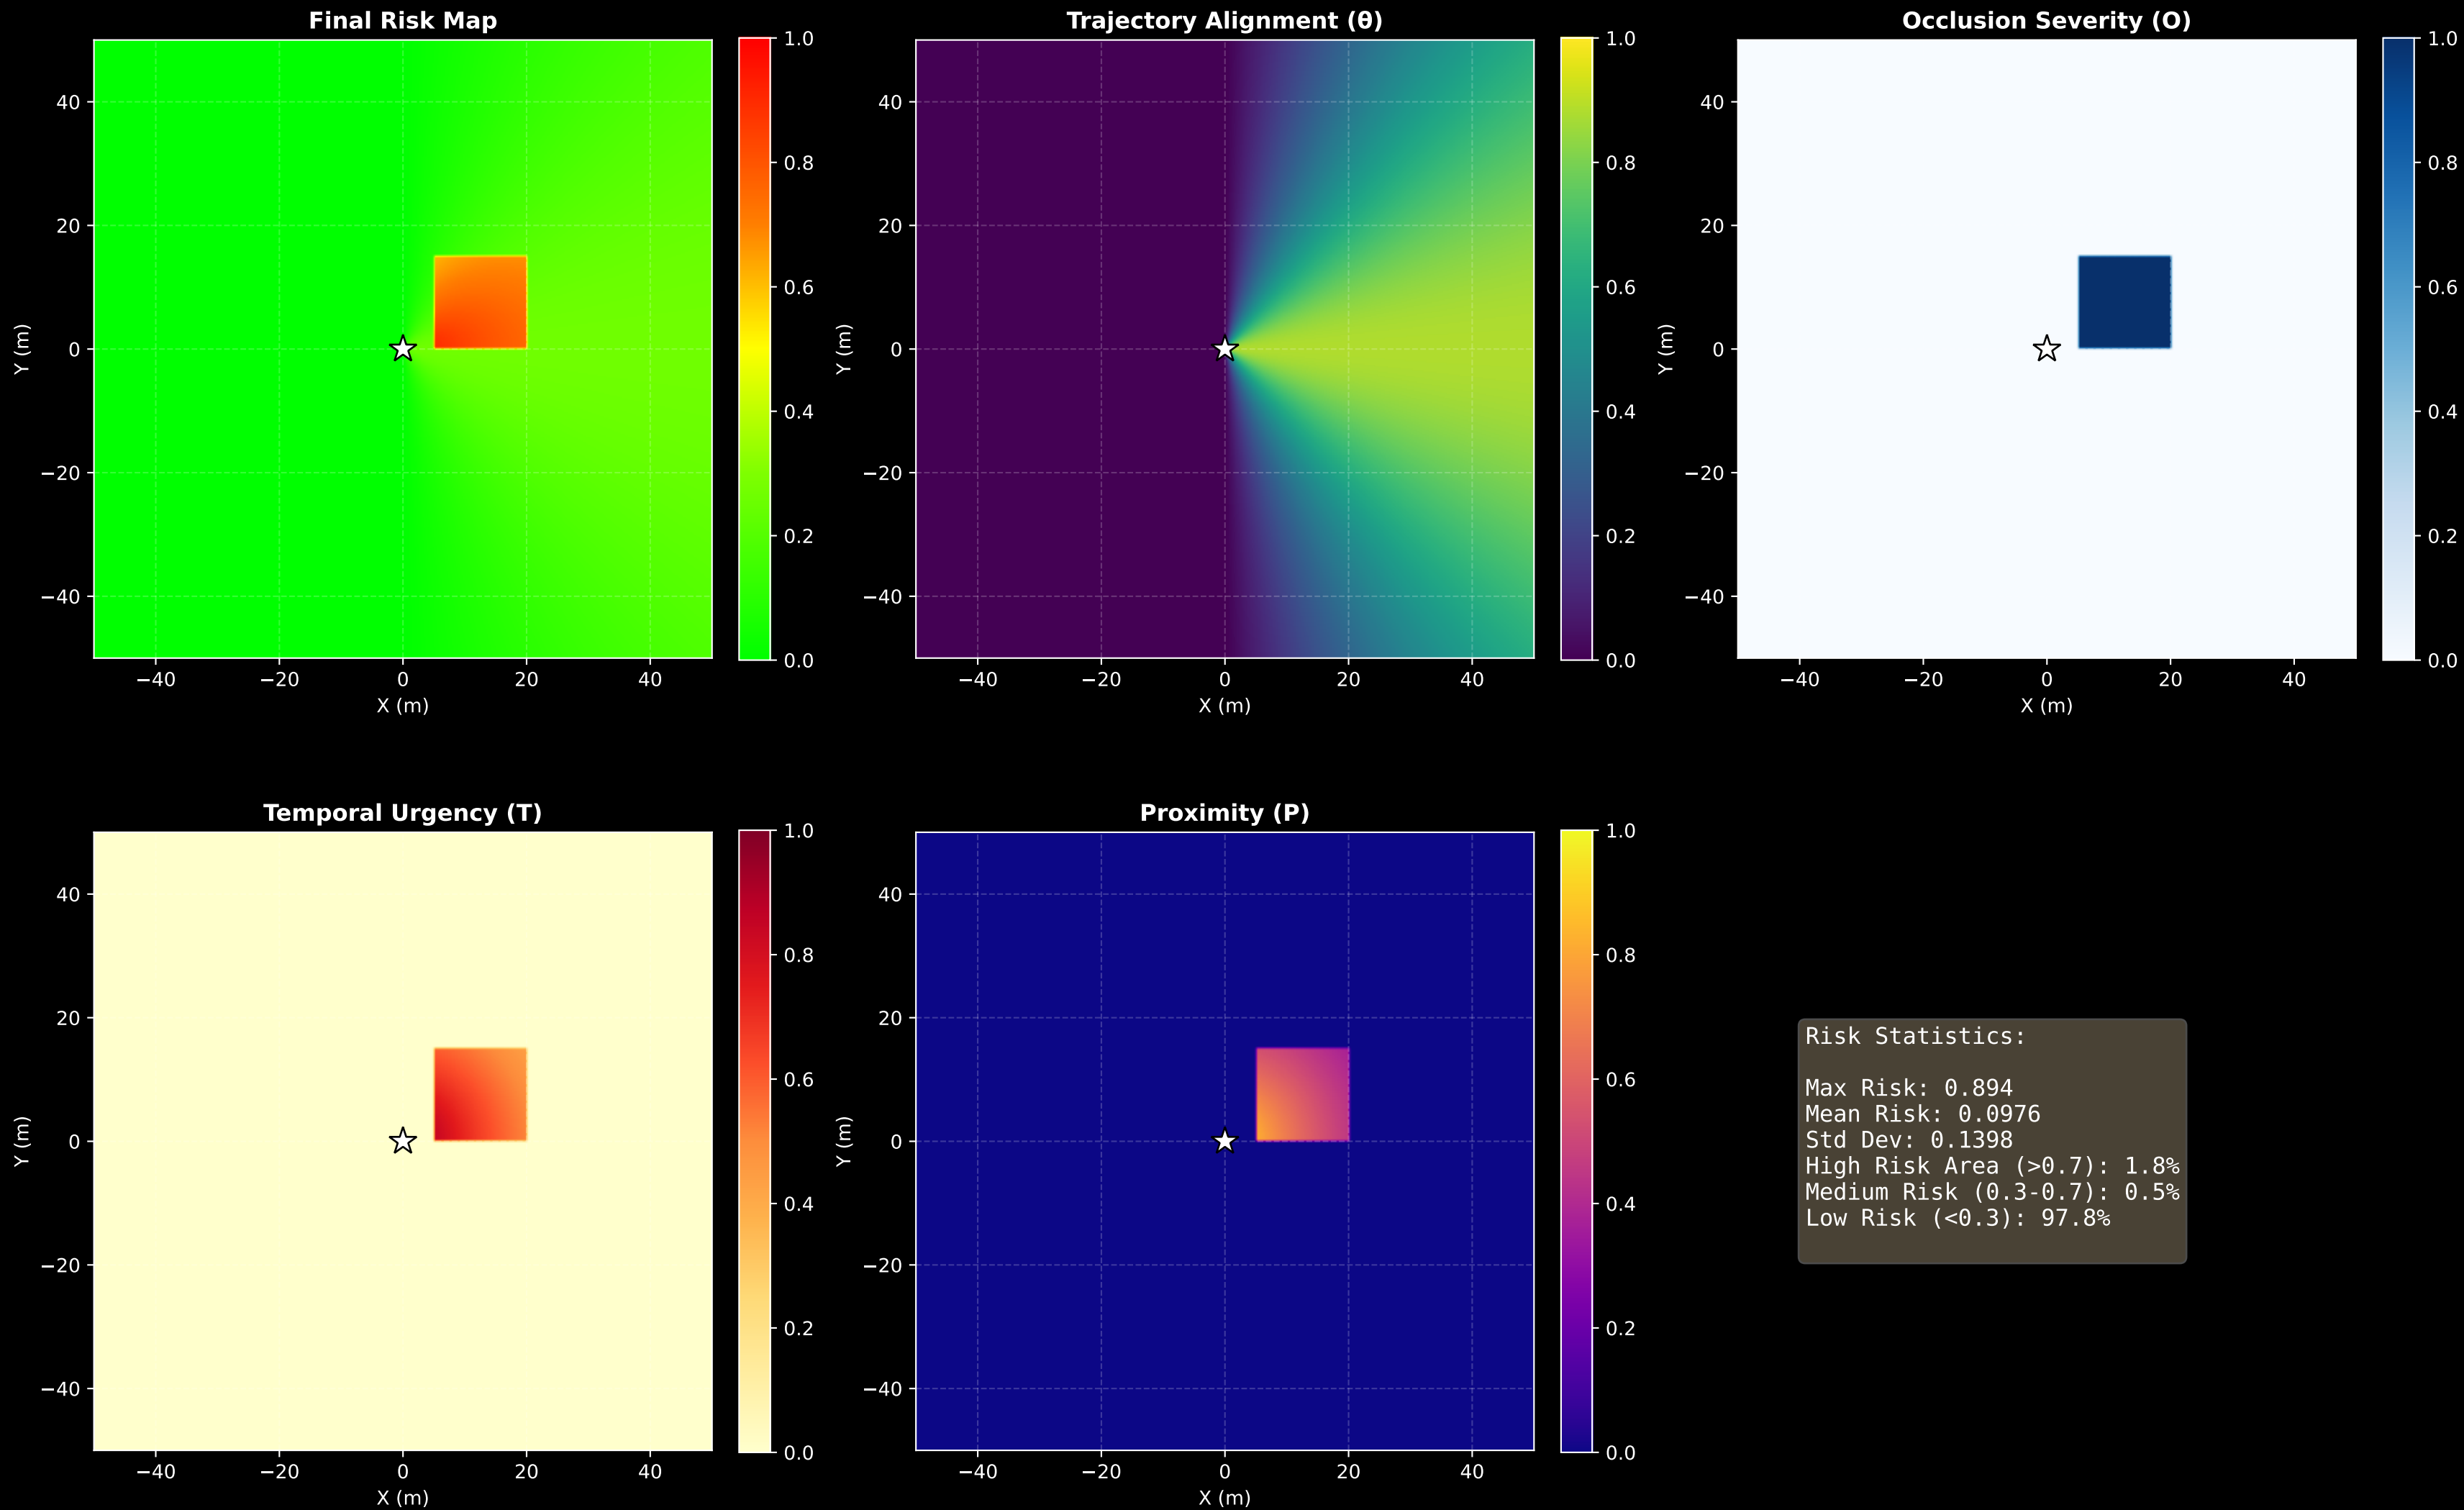

temporal\_weight: 0.2

proximity\_weight: 0.2

## OVERALL RISK STATISTICS

Risk Map Dimensions: 200 × 200 cells  
Total Cells: 40,000

### Risk Value Statistics:

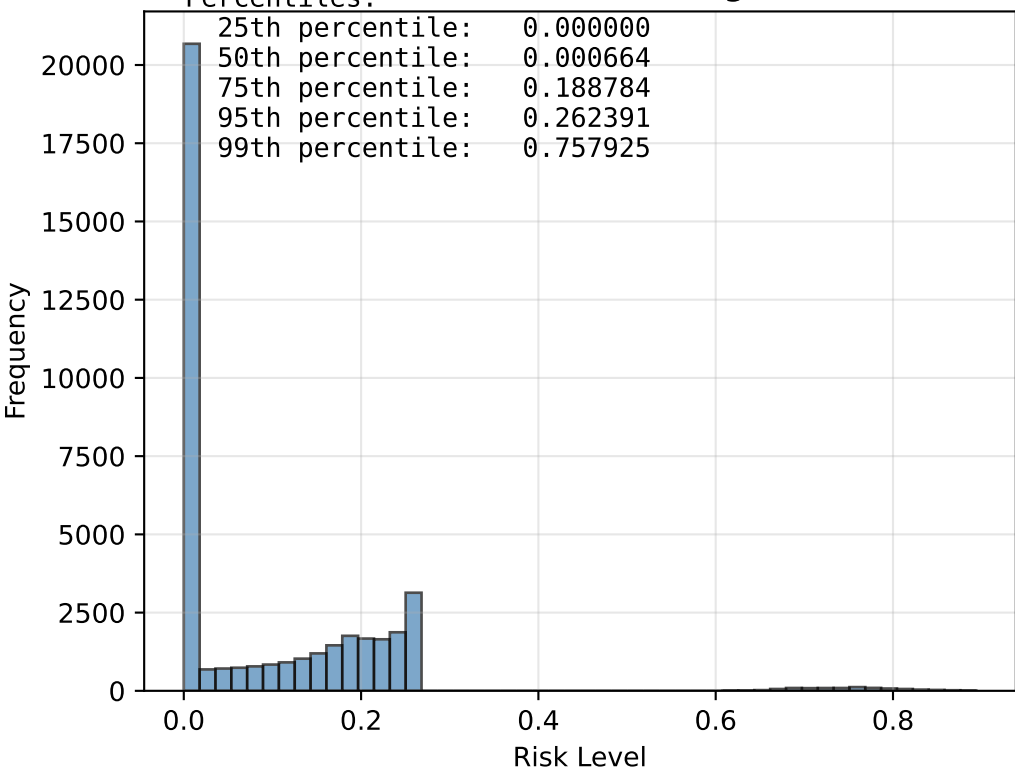

Maximum Risk: 0.893876  
Minimum Risk: 0.000000  
Mean Risk: 0.097561  
Median Risk: 0.000664  
Std Deviation: 0.139772

### Risk Distribution:

High Risk (>0.7): 700 cells ( 1.75%)  
Medium Risk (0.3-0.7): 200 cells ( 0.50%)  
Low Risk (<0.3): 39,100 cells (97.75%)

## Risk Distribution Histogram

Percentiles:  
25th percentile: 0.000000  
50th percentile: 0.000664  
75th percentile: 0.188784  
95th percentile: 0.262391  
99th percentile: 0.757925

## Risk Category Distribution
